The Love Power Ecosystem

Feel the love in every NFT

About us

The Love Power Ecosystem is an open platform for NFT enthusiasts and professionals. We offer effective tools for organizing sales and purchases of non-fungible tokens.

The Love Power Ecosystem combines into a single system:

Love Power Market

Is a decentralized marketplace for NFT professionals and amateurs. It will feature collections of top and emerging artists, as well as provide the best shopping experience for collectors.

Love Power Coin (LOVE)

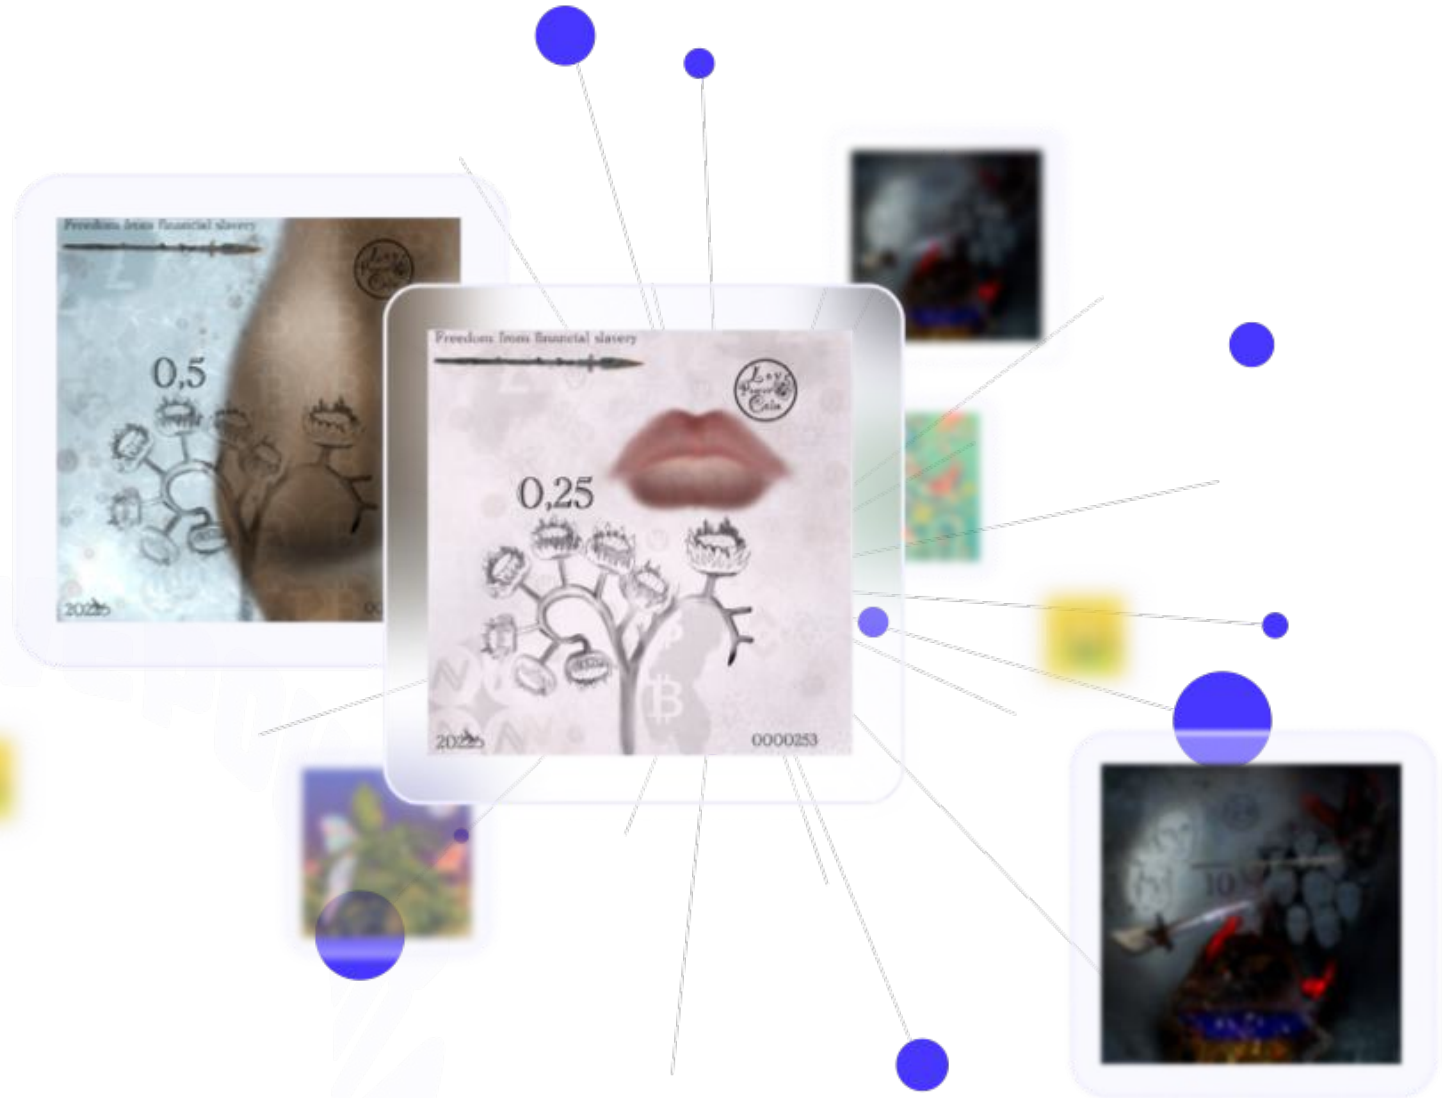

Is the native token of the ecosystem. It is used as a means of payment as well as to support the unique NFT collection. 80 % of the sales profits will be used to support the LovePower ecosystem's NFT collection.

Love Power NFTs

Make a unique collection of non-fungible tokens that was created by professional NFT artists from around the world.

Love Power Coin

Love Power Coin is the native token of the ecosystem. It is used as a means of payment and also serves to secure and maintain the Love Power NFT collection

Tokenomics

Like all our NFTs, the LOVE token is based on the Ethereum blockchain.

When choosing a blockchain, we set the following criteria: guaranteed free development and stable growth of the project with no external regulation.

Distribution:

The Total issue	1 000 000 LOVE
Withdrawn for expenses	300 000 LOVE
In free circulation on the market	700 000 LOVE

Like all our NFTs, the LOVE token is based on the Ethereum blockchain.

When choosing a blockchain, we set the following criteria: guaranteed free development and stable growth of the project with no external regulation.

Expenses:

Marketing	100 000 LOVE
Team	30 000 LOVE
Charity	170 000 LOVE
Total	300 000 LOVE

Being active in supporting NFT artists and creating a steady stream of inflows inevitably incurs some costs. To cover such costs and keep the system running, we reserve 30 % of the total issue.

Tokenomics

These funds go to:

-  Project scaling
-  NFT art market development
-  Helping NFT artists
-  Charity

Community contribution of 50 % of the sales profit is distributed as follows:

- 30 %** Is contribution to charity and NFT artists' support.
- 70 %** Is the NFT lottery pool (the lottery prize fund was created to support the community.

It provides the opportunity to win prizes and donate part of the funds to charity).

Fees from the seller:

Listing fee	1 LOVE
Community contribution fee	50 %
The minimum sales fee is	5 LOVE

For all artists, smart contracts provide royalty fees, which they can set at their discretion from 0 to 20 %. Royalty will be paid on top of the NFT price for each subsequent sale (similar to VAT).

Royalty is an additional incentive for the development of the artist's personal brand, through the use of the marketplace tools. The artist has a financial interest in being more active on the site, while for collectors, this ensures a stable increase in the value of acquired NFT assets.

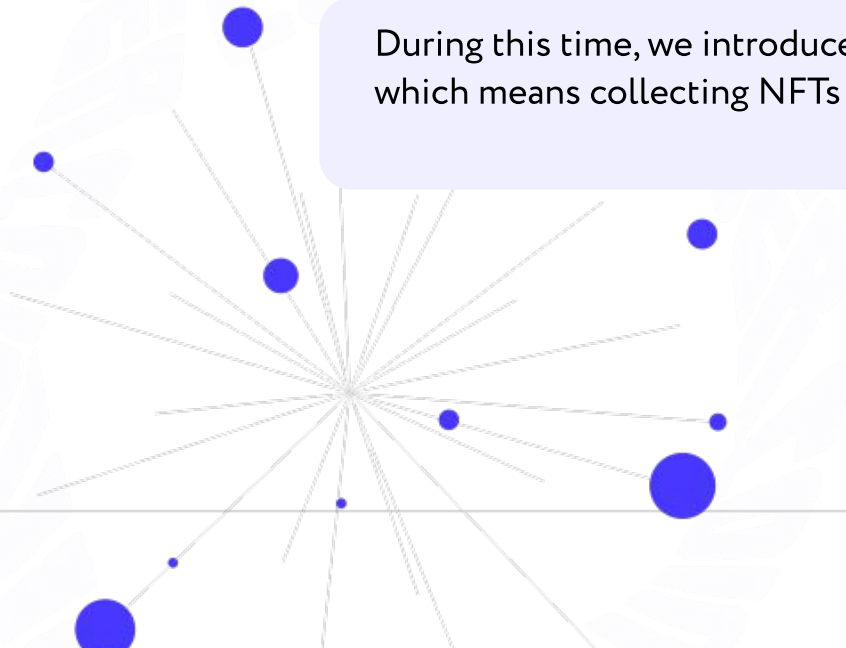

We have a generous cashback program, granting up to 30 % of each NFT listing to community leaders (accessible via unique referral link).

Love Power NFT's

The LovePowerCoin movement's own collection consists of 1,000 NFTs. Each one is inspired by the **Voynich** manuscript.

The most valuable NFTs of the movement are featured in the 'The main riddle' album and represent the mystery of the thousand-year enslavement of mankind, the answer to which can free you from financial slavery for the time being.

Our NFTs are created on the Ethereum blockchain. Each new NFT is a contribution to the development of the crypto industry. In less than a year, the LovePowerCoin movement spent about \$100,000 supporting the NFT community.

During this time, we introduced a new term to the community – the 'support wave', which means collecting NFTs from artists after selling our own.

NFT events

LovePowerCoin launched a contest of concepts in order to expand the support of our NFT community.

The winner received a prize of 1.5 ETH and 10 LovePowerCoin NFTs.

This is how the LOVE token and the LovePowerMarket marketplace were brought into life.

Love Power Marketplace

LovePowerMarket was launched in the beginning of 2024.

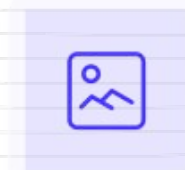

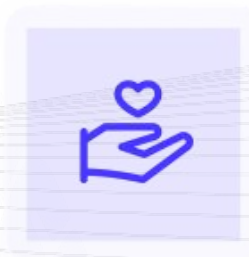

The team of developers and IT-specialists was working hard to engineer the best solutions to ensure stable and convenient functioning of the marketplace. The new platform accepts the LOVE token as payment. This is an additional driver for maintaining the high cost of the token and high demand for it.

Charity

Our project aims at supporting aspiring and advanced NFT artists around the world.

Our support includes collecting NFT works and providing gift tokens for NFT listing and running charity events in different countries. Our community also develops real-life exhibitions, creative promotions and auctions.

Our Target Audience

NFT creators

(artists, musicians, designers, etc.)

- Favorable terms of NFT minting
- Fixed commissions for creators
- Compulsory payment of royalties from each sale including resale
- Marketing and promotion of collections
- Open community from all over the world

Collectors

- Quick one-click NFT purchases
- Integration of MetaMask and other wallets
- Wide selection of NFTs: from top tokens to beginner's art-works
- 24/7 support service
- User-friendly interface

Love Power Marketplace – we create the best conditions for your purchases and sales!

Special offers for partners

For investors:

- LOVE token at a special price
- Top NFTs at a special price

For Partners :

- Co-marketing and promotion
- Opportunity to integrate services into LovePower Marketplace
- Creation of unique NFTs with the possibility of further sale on the Marketplace

1 Expertise in the NFT market for over 5 years

2 Open community of collectors and artists

3 The best conditions on the market for NFT collectors and creators

4 Support of social initiatives
